Dear Joshua,

I'm sorry to report that neither of the cultures which you sent to me (58-161 + W-1177) grew when put into broth. I called Aaron Norick & he has a couple of strains which you gave him some time ago ~~but~~ which would suffice, but a couple of differences, such as sensitivity to Streptomycin in both strains, make them sound a little less desirable than the ones you sent. So, if it isn't too much bother, I'd like a couple more samples; if it is too much bother, the ones Aaron has would serve nicely in a pinch.

Drop by the next time you're in Chicago, huh?

Sincerely
John Raper
